

Portable Infra Red Audio Soundfield Systems

These Infrared Systems have been specifically developed to provide a high quality infrared wireless microphone, receiver, amplification and loudspeaker all in one system.

Features:

- State-of-the-art infrared technology assures an interference-free, eavesdrop-free secured wireless application
- Compaander audio circuit improves signal-to-noise ratio and reduces background noise
- Switches off automatically if left unused
- Infrared signals do not penetrate walls, ensuring signal cannot be picked up in an adjacent room
- No complicated frequency allocation or licence problem
- Portable system can be carried from room to room or may be permanently installed
- Built-in IR sensor. Extra port for optional external IR sensor providing wider coverage
- Rechargeable handheld or belt-worn microphone with dedicated charging station
- Battery charging station for up to 4 AA size NiMH rechargeable batteries
- Covers an area in excess of 15m x 7m
